Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to Apparatus, classified in class 118, subclass 50.

II. Claims 10-14, drawn to Method, classified in class 427, subclass 256.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used for another and materially different process such as applying any liquid coating material, such as adhesives, polymer dispersions, biomolecules, etc to a substrate non-uniformly. The process can be carried out by another and materially different apparatus, e.g. using a syringe to apply the liquid crystal manually or robotically.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Joseph Scafetta Jr on 5-4-05 to request an oral election to the above restriction requirement, but did not result in an election being made. His recording requested that all restrictions be made via a written office action.

Art Unit: 1762

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
